*Private Tour Plan*

## Endemic Explorer: Curated Fishing Holidays in India

At Endemic Explorer, we design immersive fishing tours for those who live for the cast, the catch, and the stories that follow. For years, we have been offering world-class fishing experiences across India—ranging from trout fishing in the snow-fed rivers of the north to sea angling in the turquoise waters of the Andaman Islands and river fishing deep in the untouched wilds of Northeast India. In every location, we work closely with our trusted local associates—experts who understand the water, the species, and the rhythm of a true fishing expedition.

### ***Our Signature Adventure: Big-Game Fishing in the Andaman Islands***

One of our most sought-after tours takes you far from the mainland to the remote and reef-fringed Andaman Islands. Here, the ocean still breathes wild and free, offering an unrivalled playground for saltwater sport fishing. The waters are virtually untouched by commercial operations, teeming with marine predators and backed by dramatic drop-offs, vibrant coral reefs, and deep blue expanses.

Whether you are chasing Giant Trevally with topwater poppers, jigging for Dogtooth Tuna, or trolling for a powerful Marlin or Sailfish, this is where skill meets thrill.

### **Techniques, Target Species & Fishing Conditions**

The key species we target include Giant Trevally, Dogtooth Tuna, Yellowfin Tuna, Rusty Jobfish, Amberjack, Groupers, Great Barracuda, King Mackerel, and occasionally Blue or Black Marlin. Depending on conditions, you may fish using popping, jigging, or trolling techniques, all guided by our local team who read the seas with precision.

Trolling equipment is provided onboard, while popping and jigging gear can be brought by guests or arranged on request. Top-tier lures and jigs are also available for purchase before departure.

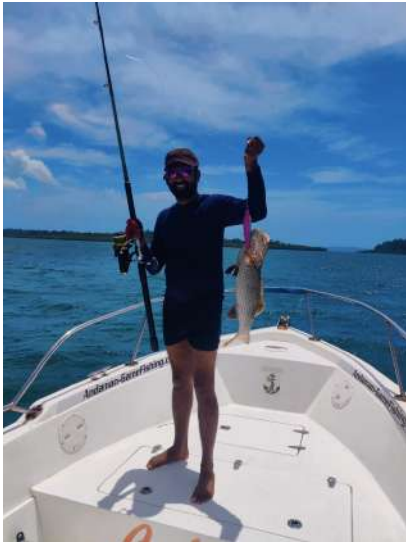

### **Season & Weather**

The fishing season in the Andamans begins in October and runs through May, with January to April being the prime period for calm seas and long-range trips to rarely fished areas. These offshore zones, accessed only under favourable weather conditions and necessary permits, offer a chance to encounter the largest and most elusive pelagics.

### **The Boat & Onboard Experience**

Guests fish aboard a custom-built, high-performance vessel fully equipped with GPS, sonar, AIS, VHF radio, a live bait tank, and all essential safety gear. With a cruising speed of 40 km/h, the boat accommodates four anglers comfortably and is manned by an experienced local skipper and deckhand who ensure both safety and an exciting day on the water.

### **Accommodation & Inclusions**

Our tour includes five nights of accommodation in a premium island lodge handpicked for comfort and proximity to fishing jetties. The experience covers airport and ferry transfers, full-day fishing over four days, all onboard meals and soft drinks, hotel breakfasts, and transport between hotel and jetty.

### **Tour Cost**

The costing for our fishing expeditions is determined based on several key factors, including the number of participants in the group, the type and size of the vessel selected, the total number of fishing days, and any additional services requested. Customisations such as long-range trips, equipment rentals, or accommodation upgrades may influence the overall cost. We will provide a personalised quotation upon receiving your preferred travel dates and group details.

### **Your Fishing Journey Awaits**

Endemic Explorer's fishing tours offer more than just a getaway—they are deeply crafted experiences designed to connect you to nature's wilder side. With personalised service, exclusive locations, and seamless logistics, we invite you to cast off and discover India's finest waters.
